Program Description :

The field of engineering is generally associated with finding solutions for real world problems in an analytical fashion using the math, science and problem-solving skills. As a chemical engineer, you will be skilled in the development, design, construction, and operation of industrial plants in which natural resources are transferred into useful products. Our Chemical Engineering program is accredited by the Canadian Engineering Accreditation Board (CEAB). At Lakehead we believe engineers must also possess excellent communication skills as well as an understanding of the business, legal, and societal issues that impact development of the technological products and processes required to meet the demands of a global economy.
