Program Description :

As you pursue a software engineering masters your educational experience will parallel the realities of the industry as you learn how to define, design, develop, and deliver modern software. Utilize computer science theories to create software that allows computers to meet the demands of an ever-changing, technologically-dependent society. Conduct research in many areas including big data analysis and mining software repositories. And gain hands-on experience through team-based projects that help you master modern software engineering techniques.

Admission Requirement :

- Hold a baccalaureate degree (or equivalent) from an accredited university or college with 3.0 CGPA and higher.
