Program Description :

The Master of Engineering (MEng) track in Architectural Engineering provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

Admission Requirement :

- The student must have a Cumulative Grade Point Average of 3.0 and higher in their Bachelors Degree from an accredited institution.
