### **Program Description :**

The Master of Cybersecurity (Extension) is designed to meet the need for well-rounded industry professionals to help organisations and society manage the increasing challenges of creating and maintaining secure online systems. The course is aimed at computing science, information technology or computer engineering graduates, with or without cybersecurity experience, who wish to learn or extend their knowledge of cybersecurity and supporting technologies. The postgraduate cybersecurity program provides IT and computing professionals with the opportunity to upskill and meet the demands of this rapidly changing field. Students in the program engage in practical, hands-on learning using technologies to create and manage secure networks, systems and devices. The program covers a broad range of current and emerging areas of cybersecurity, including network security, cloud security, mobile platform security, and IoT security. In the Master of Cybersecurity (Extension), students can also de
