Program Description :

The programme has a strong technical focus with emphasis on professional quality throughout. Areas covered include professional 3D modelling & sculpting skills, with respect to 3D topology and optimisation of assets to ensure fitness for purpose. Other topics of focus will include the design and development of game applications, along with an understanding of modern publication and distribution processes. Students will learn to analyse and optimise game applications with respect to technical performance and user experience. In addition, modern development and problem solving strategies for artificial intelligence within games will play an important role. The Games Business & Enterprise module will develop business planning, leadership and strategic skills whilst encouraging and supporting entrepreneurial activity.
